DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 7/21/04 has been entered.

The amendment to the title is accepted and has been entered.

Information Disclosure Statement

The IDS of 7/21/04 has been made of record.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.

Application/Control Number: 09/960,094

Art Unit: 2653

Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 1-4 and 17-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over DE 19639178.

With respect to apparatus claim 1, as noted in the DE reference, the ability of driving the coils of a dc motor (10) by means of an inductance device driving system (see appropriate figures 5,6, and 8 and the associated discussion thereof), wherein this system provides a predetermined electric current to the coil of the dc motor such that a pulse width of the voltage applied to the device is changed in accordance with current values hence the system comprises:

a) current detection section (42), comparison section (23), current control section (46) and the onoff control section (elements 451, 25, 46).

The above analysis is further explained in the accompanying search report submitted by applicant with the above noted IDS.

With respect to the method claim 17, such limitations are met when the above system operates.

Although applicant has amended the claims to delete "inductance device" and insert ---coil --- in place thereof, as stated in the above search report motor element 10 is an inductance device.

The examiner concludes that the motor inherently has/is "coil" and hence the rejection is presented against the amended claims.

If applicant can convince the examiner that a "coil" is not present in the above noted reference, then the examiner will provide appropriate motors with such coils.

With respect to dependent claims 2-4 and 18-20, as described in the noted passages at col. 12 lines 10-63 and figures 14a-c.

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claim 1 above, and further in view of Official notice.

Claim 5 recites the ability of having an "off time table" and that the time control section determines its off time by referring to such.

Application/Control Number: 09/960,094

Art Unit: 2653

Although the examiner cannot readily ascertain the existence of such a table, obviously there must be an appropriate time control parameters. The use of tables (such as from a rom) to provide reference values/response values in accordance with a detected incoming signal level is considered well known in the control arts, and Official notice is taken thereof.

It would have been obvious to modify the base system with the well known ability of rom to provide for reference values subsequently relied upon to provide the control signals for the "off times".

6. Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claims 1 and 17 above, and further in view of Official notice.

Although the above system is responsive to clock pulses, the examiner cannot readily ascertain if there is a "counter" therefore.

The use of counters to count clock pulses is considered well known and Official notice is taken. It would have been obvious to modify the base system with such well known circuit elements, motivation is to keep appropriate "count" of the detected signals, so as to further control the switching section so as to turn on and off according to the "count" value.

Allowable Subject Matter

- 7. Claims 9-16 are allowed.
- 8. None of the cited prior art discloses or teaches the appropriate elements as recited in independent claim 9 in the information storage environment as recited by the independent claim.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aristotelis M Psitos whose telephone number is (703) 308-1598. The examiner can normally be reached on M-Thursday 8 - 4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William R. Korzuch can be reached on (703) 305-6137. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 09/960,094
